Fishing Event: Pre-register your interest!

Every year for the past 10 years, we have organised an all day fishing event for people within the refrigeration, air conditioning, boiler, heating and renewable industry.

It's that time of the year again! Tickets will be issued free on a first come first served basis. Any donations made on the day will go to the charity in memory of the Luke Beard fund. Dates to be confirmed soon.

If you would like to pre-register, simply send us an email to marketing@pumph.co.uk and we will add you to the list.

Super Seal™ is an industry leading system safe sealant.

No.1 in UK, Australia, Korea, Hong Kong and USA

Latest Case Study: Genting Resorts World - Sky Bar, Birmingham

Products: Flexi Everyday – H-Frame Kits and Flexi-Feet, Flexi Light – Base & Extender Frames,

Flexi Heavy – Modular Frameworks & Custom Frame

Services: Cable trays, Ducts, Fan & Air-handling units

Roof build-up: Warm roof design – PIR/PUR insulation with PVC/TPO field membrane

Genting UK Plc owns and operate Resorts World Birmingham and is a part of the global leisure business, the Genting Group, headquartered in Malaysia. Resorts World Birmingham is Genting's first leisure destination to open in Europe.

Flexi Support Systems were ordered, via Smith Brothers Stores, for their customer Hockley Building Services, the M&E contractors who were installing these rooftop services. An assortment of products was required to support various services such as cable trays, ductwork, in-line fan and air-handling units. Some frameworks were also supplied with an increased frame height, to suit certain services that needed to be positioned higher above the roof finish.

Negating the requirements for traditional concrete plinths, our fully adjustable framework solutions offer a fast and simple installation process, avoiding awkward waterproofing details or roof penetrations. All solutions provide the installer with greater flexibility to make last minute changes and are supplied hot dip galvanised to suit external environments.

More Information and Case Studies available on our Flexi Website - <http://flexisupportsystems.co.uk/>

Flowatch Design Pump In Trunking

Quietly Confident!

The Pump House FLOWATCH® DESIGN is a mini condensate pump housed within duct, offering an easy to install method of removing condensate from mini-split air conditioners up to 10kW. The pump is located in the trunking to create more room in the elbow for the refrigerant pipes. Just one 90° bend is needed to secure the pipes,
